EXPERIENCE

Backend Developer Intern (Laravel)

Mucha Web Agencia de eCommerce

09/2025 - 03/2026 Remote

<https://github.com/codigo-y-tecnologia/e-commerce-agave.git>

- Collaborated with a development team to build and maintain a full-featured e-commerce platform using Laravel.
- Developed backend functionality following the MVC architecture, implementing business logic and ensuring application scalability.
- Designed and managed database structures for products, customers, orders, and transactional data.
- Contributed to the development of core e-commerce features, including product catalog management, shopping cart functionality, checkout workflows, and order processing.
- Assisted in integrating payment gateway solutions to support secure online transactions.

PROJECTS

Course Management System (React, MySQL, Node.js)

07/2024 - 03/2025 Apatzingan de la Constitucion, Mexico

<https://github.com/codigo-y-tecnologia/React-project-courses.git>

- Developed a web-based course management system using React.js to streamline course registration and academic record management.
- Designed and implemented a relational database to manage students, teachers, courses, and academic records.
- Implemented SQL JOIN operations to retrieve and display relationships between students, courses, and instructors.
- Built functionality for teachers to evaluate students and assign grades through the platform.
- Developed features enabling students to view available courses and enroll in academic programs.

Empleos ITSA (Android, Java, Firebase)

05/2023 - 03/2024 Apatzingan de la Constitucion, Mexico

- Led the development of Empleos ITSA, an Android application designed to connect students with part-time employment opportunities.
- Developed the mobile application using Java and Android Studio, integrating Firebase Authentication and Firebase Realtime Database.
- Implemented features allowing students to search, view, and apply for job opportunities directly through the application.
- Designed functionality for resume submission and direct communication between students and employers.
- Managed and structured database operations to ensure accurate and efficient job listing management.
- Collaborated with local businesses to encourage participation and expand available job opportunities.

EDUCATION

Bachelor's Degree in Computer Engineering

Instituto Tecnológico Superior de Apatzingán 2020 - 2026

SUMMARY

Recent Software Engineering graduate with hands-on experience designing and developing web and mobile applications through academic and personal projects. Skilled in Java, JavaScript, PHP, SQL, HTML, CSS, MongoDB, and modern software development practices. Strong problem solving abilities, experience working in team environments, and a passion for creating reliable and scalable software solutions. Eager to contribute to a development team as a Junior Software Engineer while continuing to grow professionally.

TRAINING & COURSES

Java, MySQL, Data Structures & Algorithms

HTML, CSS, Javascript

LANGUAGES

English intermediate ●●●●●

Spanish Native ●●●●●

SKILLS

Programming Languages: Java, JavaScript, PHP, SQL

Frameworks & Technologies: Android Studio, React.js, Laravel, Node.js, jQuery, Firebase, HTML, CSS, Git, GitHub

Databases: MySQL, MongoDB, Firebase Realtime Database
